#### DETAILED ACTION

Page 2

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 2, 8-10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Chaplain (US#3909018).
- 3. Regarding claim 1, Chaplain discloses a seal assembly for a telescoping joint comprising: a first 10 and second (not shown) nested tubular members slidably mounted with respect to each other and defining an annular space therebetween; and at least one seal 4-7 supported by one of the tubular members and sealingly spanning the annular space, the seal having a longitudinal axis an opposed ends and being compressed upon assembly to the tubular member retaining it in a direction aligned with its longitudinal axis, solely by virtue of insertion of the seal into the tubular member supporting it.
- 4. Regarding claim 2, the compression due to an interference fit in the tubular member that retains it.
- 5. Regarding claims 8 and 12, the seal is retained to the tubular member on at least one end by a projection-depression configuration between seal end projection 14 or 15 and tubular member depression 3.

Application/Control Number: 10/025,518 Page 3

Art Unit: 3677

6. Regarding claim 9, the depression is longer than the projection in a direction perpendicular to the longitudinal axis of the seal.

- 7. Regarding claim 10, the projection is generally U or V shaped.
- 8. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Warner (US#3573871).
- 9. Regarding claim 15, Warner discloses a seal assembly for a telescoping joint comprising: a first 10 and second 11 nested tubular members slidably mounted with respect to each other and defining an annular space therebetween; at least one seal 20 supported by one of the tubular members and sealingly spanning the annular space; and the seal having a longitudinal axis, opposed ends, and a sealing surface (inner surface) having an upper and lower end wherein lower end 30 is beveled with respect to the longitudinal axis.

#### Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chaplain in view of the admitted prior art (APA).
- 12. Chaplain fails to disclose the seal is formed of nitrile or polyurethane as claimed by the applicant. However, the APA (lower half of Fig. 1 of instant application) discloses a similar seal

Application/Control Number: 10/025,518

Art Unit: 3677

assembly wherein seal 10 is formed of nitrile. Therefore, as supported by the APA, it would have been an obvious design choice to utilize a nitrile seal as the selection of a known material based upon its suitability for the intended use is a design consideration within the skill of the art.

In re Leshin, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

## Allowable Subject Matter

- 13. Claims 3-7, 11, 13, and 14 are allowed.
- 14. Claims 16-18 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William L. Miller whose telephone number is 703 305 3978. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, J. J. Swann can be reached on 703 306 4115. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308 1113.
